

OPHORA™

NANO WHOLE HOME SYSTEM

Our Nano System, with its two high performance platforms and 12 layers of robust proprietary filtration media, is for people who are dedicated to enhancing and ensuring their overall good health.

The Nano Whole Home System delivers unparalleled pure, richly restructured, anti-oxidant water throughout your entire home. This system is far superior to traditional carbon based whole house systems which do not remove all heavy metals, fluoride, nitrates, and other pollutants from source water and are susceptible to mold during periods of non-use. The Nano system removes 99.99% of dissolved solids (filtering to .001 microns). Our final UV sterilization process insures that with or without constant use, our Nano system produces 99.99% bacteria free water even, in the event of a boil alert.

Our advanced up-flow system eliminates the need for backwashing, which increases efficiency and eliminates waste-water. Best of all, in addition to producing 99.99% pure water, our Nano system delivers spring tasting, restructured water that is richly re-mineralized, perfectly alkaline, and highly antioxidant.

Nano System benefits:

- Nano filtered to 0.001 microns
- Organically filtered pure water
- Customized filter media built to your local water profile
- Built-in UV sterilization
- Delivers re-mineralized, alkalized, ionized, highly anti-oxidant water
- Five-year limited warranty
- Annual maintenance contract
- Digital remote monitoring display available
- Pre-plumbed, pre-wired, and self-contained system, designed to your requirements
