

OPHORA™

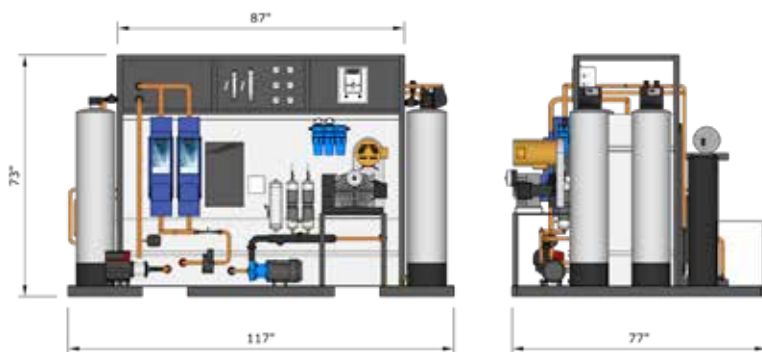

ULTRA ESTATE SYSTEM

Designed for the health-conscious family that demands the very best, our Ultra Whole Home System nano-filters to 0.0001 microns and ultra purifies, delivering high quality, oxygen-rich, restructured water from every faucet in your home. Our Ultra System will accommodate homes upwards of 20,000 sq/ft.

Drinking, bathing, and showering in Ophora water is one of the most important steps you can take to promote good health. In a world of mediocre, mass-produced water filtration systems, the Ophora Ultra system is ideal for health conscious individuals.

Our patent pending system with its 14 layers of robust proprietary filter media has been specifically engineered as the ultimate solution to the substandard and problematic source water flowing into our homes. This isn't just another water industry carbon based filtration system labeled as a whole home device. Ophora's Ultra technology is the only guaranteed and proven methodology for removing all known (and rarely-detected) pollutants from source water, including difficult to remove pharmaceuticals and trace hormones.

Ultra System benefits:

- Customized filter media engineered specifically to your local source water
- Organically filtered pure water
- Built-in UV sterilization
- Infused with 15-50 PPM stabilized oxygen (adjustable)
- Delivers re-mineralized, alkalized, ionized, highly anti-oxidant water
- 80% less waste water than comparable RO systems
- Exclusive Five-year limited warranty
- Digital remote monitoring display included
- Portable, pre-plumbed, pre-wired, and totally self-contained, can be crated and shipped anywhere worldwide
- Designed to your requirements
